11.80.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int8_t> >

Definition at line 33 of file Pointset_Powerset_BD_Shape_int8_t.java.

11.80.2 Constructor & Destructor Documentation

11.80.2.1 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.80.2.2 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t () [inline, private]

Definition at line 45 of file Pointset_Powerset_BD_Shape_int8_t.java.

11.80.2.3 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (Pointset_Powerset_BD_Shape_int8_t *y*) [inline]

Definition at line 52 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.80.2.4 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (BD_Shape_int8_t *y*) [inline]

Definition at line 56 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.80.2.5 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (Pointset_Powerset_BD_Shape_int8_t *y*, Complexity_Class *complexity*) [inline]

Definition at line 65 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.80.2.6 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (BD_Shape_int8_t *y*, Complexity_Class *complexity*) [inline]

Definition at line 69 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.80.2.7 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (Constraint_System *cs*) [inline]

Definition at line 78 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.80.2.8 parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t::Pointset_Powerset_BD_Shape_int8_t (Congruence_System *cs*) [inline]

Definition at line 82 of file Pointset_Powerset_BD_Shape_int8_t.java.

References build_cpp_object().

11.82.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<long double> >

Definition at line 33 of file Pointset_Powerset_BD_Shape_long_double.java.

11.82.2 Constructor & Destructor Documentation

11.82.2.1 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.82.2.2 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double () [inline, private]

Definition at line 45 of file Pointset_Powerset_BD_Shape_long_double.java.

11.82.2.3 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (Pointset_Powerset_BD_Shape_long_double *y*) [inline]

Definition at line 52 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.82.2.4 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (BD_Shape_long_double *y*) [inline]

Definition at line 56 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.82.2.5 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (Pointset_Powerset_BD_Shape_long_double *y*, Complexity_Class *complexity*) [inline]

Definition at line 65 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.82.2.6 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (BD_Shape_long_double *y*, Complexity_Class *complexity*) [inline]

Definition at line 69 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.82.2.7 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (Constraint_System *cs*) [inline]

Definition at line 78 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.82.2.8 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double::Pointset_Powerset_BD_Shape_long_double (Congruence_System *cs*) [inline]

Definition at line 82 of file Pointset_Powerset_BD_Shape_long_double.java.

References build_cpp_object().

11.83.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<long double> >:: iterator.

Definition at line 30 of file Pointset_Powerset_BD_Shape_long_double_Iterator.java.

11.83.2 Constructor & Destructor Documentation

11.83.2.1 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double_-Iterator::Pointset_Powerset_BD_Shape_long_double_Iterator () [inline, private]

Definition at line 32 of file Pointset_Powerset_BD_Shape_long_double_Iterator.java.

11.83.2.2 parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_-double_Iterator::Pointset_Powerset_BD_Shape_long_double_Iterator (Pointset_Powerset_BD_Shape_long_double_Iterator *y*) [inline]

Definition at line 36 of file Pointset_Powerset_BD_Shape_long_double_Iterator.java.

References build_cpp_object().

11.83.3 Member Function Documentation

11.83.3.1 native void parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double_-Iterator::build_cpp_object (Pointset_Powerset_BD_Shape_long_double_Iterator *y*) [private]

Referenced by Pointset_Powerset_BD_Shape_long_double_Iterator().

11.83.3.2 native void parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double_Iterator::build_ppl_object (Pointset_Powerset_BD_Shape_long_double *obj*) [private]

11.112.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int16_t> >

Definition at line 33 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

11.112.2 Constructor & Destructor Documentation

11.112.2.1 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.112.2.2 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t () [inline, private]

Definition at line 45 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

11.112.2.3 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (Pointset_Powerset_Octagonal_Shape_int16_t *y*) [inline]

Definition at line 52 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.112.2.4 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (Octagonal_Shape_int16_t *y*) [inline]

Definition at line 56 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.112.2.5 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (Pointset_Powerset_Octagonal_Shape_int16_t *y*, Complexity_Class *complexity*) [inline]

Definition at line 65 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.112.2.6 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (Octagonal_Shape_int16_t *y*, Complexity_Class *complexity*) [inline]

Definition at line 69 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.112.2.7 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (Constraint_System *cs*) [inline]

Definition at line 78 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.112.2.8 parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t::Pointset_Powerset_Octagonal_Shape_int16_t (Congruence_System *cs*) [inline]

Definition at line 82 of file Pointset_Powerset_Octagonal_Shape_int16_t.java.

References build_cpp_object().

11.130.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint32_Box>

Definition at line 33 of file Pointset_Powerset_Uint32_Box.java.

11.130.2 Constructor & Destructor Documentation

11.130.2.1 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.130.2.2 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box () [inline, private]

Definition at line 45 of file Pointset_Powerset_Uint32_Box.java.

11.130.2.3 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (Pointset_Powerset_Uint32_Box *y*) [inline]

Definition at line 52 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.130.2.4 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (Uint32_Box *y*) [inline]

Definition at line 56 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.130.2.5 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (Pointset_Powerset_Uint32_Box *y*, Complexity_Class *complexity*) [inline]

Definition at line 65 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.130.2.6 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (Uint32_Box *y*, Complexity_Class *complexity*) [inline]

Definition at line 69 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.130.2.7 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (Constraint_System *cs*) [inline]

Definition at line 78 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.130.2.8 parma_polyhedra_library::Pointset_Powerset_Uint32_Box::Pointset_Powerset_Uint32_Box (Congruence_System *cs*) [inline]

Definition at line 82 of file Pointset_Powerset_Uint32_Box.java.

References build_cpp_object().

11.132.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint64_Box>

Definition at line 33 of file Pointset_Powerset_Uint64_Box.java.

11.132.2 Constructor & Destructor Documentation

11.132.2.1 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.132.2.2 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box () [inline, private]

Definition at line 45 of file Pointset_Powerset_Uint64_Box.java.

11.132.2.3 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (Pointset_Powerset_Uint64_Box *y*) [inline]

Definition at line 52 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.132.2.4 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (Uint64_Box *y*) [inline]

Definition at line 56 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.132.2.5 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (Pointset_Powerset_Uint64_Box *y*, Complexity_Class *complexity*) [inline]

Definition at line 65 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.132.2.6 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (Uint64_Box *y*, Complexity_Class *complexity*) [inline]

Definition at line 69 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.132.2.7 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (Constraint_System *cs*) [inline]

Definition at line 78 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.132.2.8 parma_polyhedra_library::Pointset_Powerset_Uint64_Box::Pointset_Powerset_Uint64_Box (Congruence_System *cs*) [inline]

Definition at line 82 of file Pointset_Powerset_Uint64_Box.java.

References build_cpp_object().

11.138 parma_polyhedra_library::Poly_Con_Relation Class Reference

The relation between a polyhedron and a constraint.

Public Member Functions

- Poly_Con_Relation (int val)
  Constructs from a integer value.
- boolean implies (Poly_Con_Relation y)
  True if and only if `*this` *implies* `y`.

Static Public Member Functions

- static Poly_Con_Relation nothing ()

  The assertion that says nothing.

- static Poly_Con_Relation is_disjoint ()

  The polyhedron and the set of points satisfying the constraint are disjoint.

- static Poly_Con_Relation strictly_intersects ()

  The polyhedron intersects the set of points satisfying the constraint, but it is not included in it.

- static Poly_Con_Relation is_included ()

  The polyhedron is included in the set of points satisfying the constraint.

- static Poly_Con_Relation saturates ()

  The polyhedron is included in the set of points saturating the constraint.

Static Public Attributes

- static final int NOTHING = 0
- static final int IS_DISJOINT = 1
- static final int STRICTLY_INTERSECTS = 2

Protected Member Functions

- PPL_Object ()

  Builds an object that points to 'null'.

Static Package Functions

- [static initializer]

Package Attributes

- long ptr

  Stores the value of the C++ pointer.

Static Private Member Functions

- static native void initIDs ()

11.141.1 Detailed Description

Smart pointer to a PPL, C++ object.

Definition at line 32 of file PPL_Object.java.

11.141.2 Constructor & Destructor Documentation

11.141.2.1 parma_polyhedra_library::PPL_Object::PPL_Object () [inline, protected]

Builds an object that points to 'null'.

Definition at line 38 of file PPL_Object.java.

References ptr.

11.141.3 Member Function Documentation

11.141.3.1 parma_polyhedra_library::PPL_Object::[static initializer] () [inline, static, package]

11.141.3.2 static native void parma_polyhedra_library::PPL_Object::initIDs () [static, private]

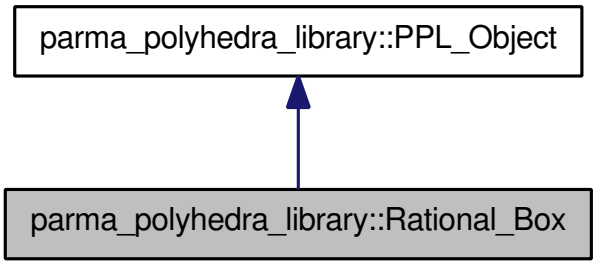
11.141.4 Member Data Documentation

11.141.4.1 long parma_polyhedra_library::PPL_Object::ptr [package]

Stores the value of the C++ pointer.

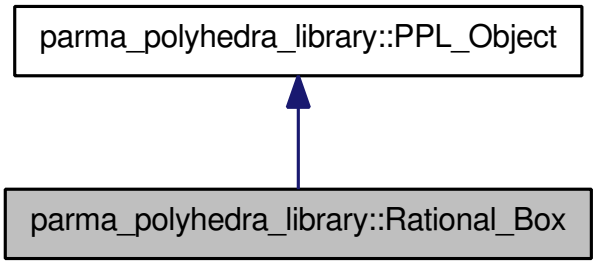
Definition at line 35 of file PPL_Object.java.

Referenced by PPL_Object().



The documentation for this class was generated from the following file:

- PPL_Object.java



11.142 parma_polyhedra_library::Rational_Box Class Reference

Java class interfacing C++ Parma_Polyhedra_Library::Rational_Box.

11.142.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Rational_Box.

Definition at line 33 of file Rational_Box.java.

11.142.2 Constructor & Destructor Documentation

11.142.2.1 parma_polyhedra_library::Rational_Box::Rational_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Rational_Box.java.

References build_cpp_object().

11.142.2.2 parma_polyhedra_library::Rational_Box::Rational_Box () [inline, private]

Definition at line 45 of file Rational_Box.java.

11.142.2.3 parma_polyhedra_library::Rational_Box::Rational_Box (Int8_Box *y*) [inline]

Definition at line 52 of file Rational_Box.java.

References build_cpp_object().

11.142.2.4 parma_polyhedra_library::Rational_Box::Rational_Box (Int16_Box *y*) [inline]

Definition at line 56 of file Rational_Box.java.

References build_cpp_object().

11.142.2.5 parma_polyhedra_library::Rational_Box::Rational_Box (Int32_Box *y*) [inline]

Definition at line 60 of file Rational_Box.java.

References build_cpp_object().

11.142.2.6 parma_polyhedra_library::Rational_Box::Rational_Box (Int64_Box *y*) [inline]

Definition at line 64 of file Rational_Box.java.

References build_cpp_object().

11.142.2.7 parma_polyhedra_library::Rational_Box::Rational_Box (Uint8_Box *y*) [inline]

Definition at line 68 of file Rational_Box.java.

References build_cpp_object().

11.142.2.8 parma_polyhedra_library::Rational_Box::Rational_Box (Uint16_Box *y*) [inline]

Definition at line 72 of file Rational_Box.java.

References build_cpp_object().

11.142.2.9 parma_polyhedra_library::Rational_Box::Rational_Box (Uint32_Box *y*) [inline]

Definition at line 76 of file Rational_Box.java.

References build_cpp_object().

11.142.2.10 parma_polyhedra_library::Rational_Box::Rational_Box (Uint64_Box *y*) [inline]

Definition at line 80 of file Rational_Box.java.

References build_cpp_object().

11.142.2.11 parma_polyhedra_library::Rational_Box::Rational_Box (Z_Box *y*) [inline]

Definition at line 84 of file Rational_Box.java.

References build_cpp_object().

11.142.2.12 parma_polyhedra_library::Rational_Box::Rational_Box (Rational_Box *y*) [inline]

Definition at line 88 of file Rational_Box.java.

References build_cpp_object().

11.142.2.13 parma_polyhedra_library::Rational_Box::Rational_Box (BD_Shape_int8_t *y*) [inline]

Definition at line 92 of file Rational_Box.java.

References build_cpp_object().

11.142.2.14 parma_polyhedra_library::Rational_Box::Rational_Box (BD_Shape_int16_t *y*) [inline]

Definition at line 96 of file Rational_Box.java.

References build_cpp_object().

11.142.2.15 parma_polyhedra_library::Rational_Box::Rational_Box (BD_Shape_int32_t *y*) [inline]

Definition at line 100 of file Rational_Box.java.

References build_cpp_object().

11.142.2.16 parma_polyhedra_library::Rational_Box::Rational_Box (BD_Shape_int64_t *y*) [inline]

Definition at line 104 of file Rational_Box.java.

References build_cpp_object().

11.142.2.17 parma_polyhedra_library::Rational_Box::Rational_Box (BD_Shape_mpz_class *y*) [inline]

Definition at line 108 of file Rational_Box.java.

References build_cpp_object().

11.142.2.18 parma_polyhedra_library::Rational_Box::Rational_Box (BD_Shape_mpq_class *y*) [inline]

Definition at line 112 of file Rational_Box.java.

References build_cpp_object().

11.142.2.19 parma_polyhedra_library::Rational_Box::Rational_Box (Octagonal_Shape_int8_t *y*) [inline]

Definition at line 116 of file Rational_Box.java.

References build_cpp_object().

11.142.2.20 parma_polyhedra_library::Rational_Box::Rational_Box (Octagonal_Shape_int16_t *y*) [inline]

Definition at line 120 of file Rational_Box.java.

References build_cpp_object().

11.142.2.21 parma_polyhedra_library::Rational_Box::Rational_Box (Octagonal_Shape_int32_t *y*) [inline]

Definition at line 124 of file Rational_Box.java.

References build_cpp_object().

11.142.2.22 parma_polyhedra_library::Rational_Box::Rational_Box (Octagonal_Shape_int64_t *y*) [inline]

Definition at line 128 of file Rational_Box.java.

References build_cpp_object().

11.142.2.23 parma_polyhedra_library::Rational_Box::Rational_Box (Octagonal_Shape_mpz_class *y*) [inline]

Definition at line 132 of file Rational_Box.java.

References build_cpp_object().

11.147.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Uint32_Box.

Definition at line 33 of file Uint32_Box.java.

11.147.2 Constructor & Destructor Documentation

11.147.2.1 parma_polyhedra_library::Uint32_Box::Uint32_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.2 parma_polyhedra_library::Uint32_Box::Uint32_Box () [inline, private]

Definition at line 45 of file Uint32_Box.java.

11.147.2.3 parma_polyhedra_library::Uint32_Box::Uint32_Box (Int8_Box *y*) [inline]

Definition at line 52 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.4 parma_polyhedra_library::Uint32_Box::Uint32_Box (Int16_Box *y*) [inline]

Definition at line 56 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.5 parma_polyhedra_library::Uint32_Box::Uint32_Box (Int32_Box *y*) [inline]

Definition at line 60 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.6 parma_polyhedra_library::Uint32_Box::Uint32_Box (Int64_Box *y*) [inline]

Definition at line 64 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.7 parma_polyhedra_library::Uint32_Box::Uint32_Box (Uint8_Box *y*) [inline]

Definition at line 68 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.8 parma_polyhedra_library::Uint32_Box::Uint32_Box (Uint16_Box *y*) [inline]

Definition at line 72 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.9 parma_polyhedra_library::Uint32_Box::Uint32_Box (Uint32_Box *y*) [inline]

Definition at line 76 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.10 parma_polyhedra_library::Uint32_Box::Uint32_Box (Uint64_Box *y*) [inline]

Definition at line 80 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.11 parma_polyhedra_library::Uint32_Box::Uint32_Box (Z_Box *y*) [inline]

Definition at line 84 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.12 parma_polyhedra_library::Uint32_Box::Uint32_Box (Rational_Box *y*) [inline]

Definition at line 88 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.13 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_int8_t *y*) [inline]

Definition at line 92 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.14 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_int16_t *y*) [inline]

Definition at line 96 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.15 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_int32_t *y*) [inline]

Definition at line 100 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.16 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_int64_t *y*) [inline]

Definition at line 104 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.17 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_mpz_class *y*) [inline]

Definition at line 108 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.18 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_mpq_class *y*) [inline]

Definition at line 112 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.19 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_int8_t *y*) [inline]

Definition at line 116 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.20 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_int16_t *y*) [inline]

Definition at line 120 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.21 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_int32_t *y*) [inline]

Definition at line 124 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.22 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_int64_t *y*) [inline]

Definition at line 128 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.23 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_mpz_class *y*) [inline]

Definition at line 132 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.24 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_mpq_class *y*) [inline]

Definition at line 136 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.25 parma_polyhedra_library::Uint32_Box::Uint32_Box (C_Polyhedron *y*) [inline]

Definition at line 140 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.26 parma_polyhedra_library::Uint32_Box::Uint32_Box (NNC_Polyhedron *y*) [inline]

Definition at line 144 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.27 parma_polyhedra_library::Uint32_Box::Uint32_Box (Grid *y*) [inline]

Definition at line 148 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.28 parma_polyhedra_library::Uint32_Box::Uint32_Box (Float_Box *y*) [inline]

Definition at line 152 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.29 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_float *y*) [inline]

Definition at line 156 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.30 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_float *y*) [inline]

Definition at line 160 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.31 parma_polyhedra_library::Uint32_Box::Uint32_Box (Double_Box *y*) [inline]

Definition at line 164 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.32 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_double *y*) [inline]

Definition at line 168 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.33 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_double *y*) [inline]

Definition at line 172 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.34 parma_polyhedra_library::Uint32_Box::Uint32_Box (Long_Double_Box *y*) [inline]

Definition at line 176 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.35 parma_polyhedra_library::Uint32_Box::Uint32_Box (BD_Shape_long_double *y*) [inline]

Definition at line 180 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.36 parma_polyhedra_library::Uint32_Box::Uint32_Box (Octagonal_Shape_long_double *y*) [inline]

Definition at line 184 of file Uint32_Box.java.

References build_cpp_object().

11.147.2.37 parma_polyhedra_library::Uint32_Box::Uint32_Box (Int8_Box *y*, Complexity_Class *complexity*) [inline]

Definition at line 193 of file Uint32_Box.java.

References build_cpp_object().

11.148.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Uint64_Box.

Definition at line 33 of file Uint64_Box.java.

11.148.2 Constructor & Destructor Documentation

11.148.2.1 parma_polyhedra_library::Uint64_Box::Uint64_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.2 parma_polyhedra_library::Uint64_Box::Uint64_Box () [inline, private]

Definition at line 45 of file Uint64_Box.java.

11.148.2.3 parma_polyhedra_library::Uint64_Box::Uint64_Box (Int8_Box *y*) [inline]

Definition at line 52 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.4 parma_polyhedra_library::Uint64_Box::Uint64_Box (Int16_Box *y*) [inline]

Definition at line 56 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.5 parma_polyhedra_library::Uint64_Box::Uint64_Box (Int32_Box *y*) [inline]

Definition at line 60 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.6 parma_polyhedra_library::Uint64_Box::Uint64_Box (Int64_Box *y*) [inline]

Definition at line 64 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.7 parma_polyhedra_library::Uint64_Box::Uint64_Box (Uint8_Box *y*) [inline]

Definition at line 68 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.8 parma_polyhedra_library::Uint64_Box::Uint64_Box (Uint16_Box *y*) [inline]

Definition at line 72 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.9 parma_polyhedra_library::Uint64_Box::Uint64_Box (Uint32_Box *y*) [inline]

Definition at line 76 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.10 parma_polyhedra_library::Uint64_Box::Uint64_Box (Uint64_Box *y*) [inline]

Definition at line 80 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.11 parma_polyhedra_library::Uint64_Box::Uint64_Box (Z_Box *y*) [inline]

Definition at line 84 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.12 parma_polyhedra_library::Uint64_Box::Uint64_Box (Rational_Box *y*) [inline]

Definition at line 88 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.13 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_int8_t *y*) [inline]

Definition at line 92 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.14 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_int16_t *y*) [inline]

Definition at line 96 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.15 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_int32_t *y*) [inline]

Definition at line 100 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.16 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_int64_t *y*) [inline]

Definition at line 104 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.17 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_mpz_class *y*) [inline]

Definition at line 108 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.18 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_mpq_class *y*) [inline]

Definition at line 112 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.19 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_int8_t *y*) [inline]

Definition at line 116 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.20 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_int16_t *y*) [inline]

Definition at line 120 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.21 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_int32_t *y*) [inline]

Definition at line 124 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.22 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_int64_t *y*) [inline]

Definition at line 128 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.23 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_mpz_class *y*) [inline]

Definition at line 132 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.24 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_mpq_class *y*) [inline]

Definition at line 136 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.25 parma_polyhedra_library::Uint64_Box::Uint64_Box (C_Polyhedron *y*) [inline]

Definition at line 140 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.26 parma_polyhedra_library::Uint64_Box::Uint64_Box (NNC_Polyhedron *y*) [inline]

Definition at line 144 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.27 parma_polyhedra_library::Uint64_Box::Uint64_Box (Grid *y*) [inline]

Definition at line 148 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.28 parma_polyhedra_library::Uint64_Box::Uint64_Box (Float_Box *y*) [inline]

Definition at line 152 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.29 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_float *y*) [inline]

Definition at line 156 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.30 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_float *y*) [inline]

Definition at line 160 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.31 parma_polyhedra_library::Uint64_Box::Uint64_Box (Double_Box *y*) [inline]

Definition at line 164 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.32 parma_polyhedra_library::Uint64_Box::Uint64_Box (BD_Shape_double *y*) [inline]

Definition at line 168 of file Uint64_Box.java.

References build_cpp_object().

11.148.2.33 parma_polyhedra_library::Uint64_Box::Uint64_Box (Octagonal_Shape_double *y*) [inline]

Definition at line 172 of file Uint64_Box.java.

References build_cpp_object().

11.149.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Uint8_Box.

Definition at line 33 of file Uint8_Box.java.

11.149.2 Constructor & Destructor Documentation

11.149.2.1 parma_polyhedra_library::Uint8_Box::Uint8_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.2 parma_polyhedra_library::Uint8_Box::Uint8_Box () [inline, private]

Definition at line 45 of file Uint8_Box.java.

11.149.2.3 parma_polyhedra_library::Uint8_Box::Uint8_Box (Int8_Box *y*) [inline]

Definition at line 52 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.4 parma_polyhedra_library::Uint8_Box::Uint8_Box (Int16_Box *y*) [inline]

Definition at line 56 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.5 parma_polyhedra_library::Uint8_Box::Uint8_Box (Int32_Box *y*) [inline]

Definition at line 60 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.6 parma_polyhedra_library::Uint8_Box::Uint8_Box (Int64_Box *y*) [inline]

Definition at line 64 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.7 parma_polyhedra_library::Uint8_Box::Uint8_Box (Uint8_Box *y*) [inline]

Definition at line 68 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.8 parma_polyhedra_library::Uint8_Box::Uint8_Box (Uint16_Box *y*) [inline]

Definition at line 72 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.9 parma_polyhedra_library::Uint8_Box::Uint8_Box (Uint32_Box *y*) [inline]

Definition at line 76 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.10 parma_polyhedra_library::Uint8_Box::Uint8_Box (Uint64_Box *y*) [inline]

Definition at line 80 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.11 parma_polyhedra_library::Uint8_Box::Uint8_Box (Z_Box *y*) [inline]

Definition at line 84 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.12 parma_polyhedra_library::Uint8_Box::Uint8_Box (Rational_Box *y*) [inline]

Definition at line 88 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.13 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_int8_t *y*) [inline]

Definition at line 92 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.14 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_int16_t *y*) [inline]

Definition at line 96 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.15 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_int32_t *y*) [inline]

Definition at line 100 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.16 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_int64_t *y*) [inline]

Definition at line 104 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.17 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_mpz_class *y*) [inline]

Definition at line 108 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.18 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_mpq_class *y*) [inline]

Definition at line 112 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.19 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_int8_t *y*) [inline]

Definition at line 116 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.20 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_int16_t *y*) [inline]

Definition at line 120 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.21 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_int32_t *y*) [inline]

Definition at line 124 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.22 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_int64_t *y*) [inline]

Definition at line 128 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.23 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_mpz_class *y*) [inline]

Definition at line 132 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.24 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_mpq_class *y*) [inline]

Definition at line 136 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.25 parma_polyhedra_library::Uint8_Box::Uint8_Box (C_Polyhedron *y*) [inline]

Definition at line 140 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.26 parma_polyhedra_library::Uint8_Box::Uint8_Box (NNC_Polyhedron *y*) [inline]

Definition at line 144 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.27 parma_polyhedra_library::Uint8_Box::Uint8_Box (Grid *y*) [inline]

Definition at line 148 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.28 parma_polyhedra_library::Uint8_Box::Uint8_Box (Float_Box *y*) [inline]

Definition at line 152 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.29 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_float *y*) [inline]

Definition at line 156 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.30 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_float *y*) [inline]

Definition at line 160 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.31 parma_polyhedra_library::Uint8_Box::Uint8_Box (Double_Box *y*) [inline]

Definition at line 164 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.32 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_double *y*) [inline]

Definition at line 168 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.33 parma_polyhedra_library::Uint8_Box::Uint8_Box (Octagonal_Shape_double *y*) [inline]

Definition at line 172 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.34 parma_polyhedra_library::Uint8_Box::Uint8_Box (Long_Double_Box *y*) [inline]

Definition at line 176 of file Uint8_Box.java.

References build_cpp_object().

11.149.2.35 parma_polyhedra_library::Uint8_Box::Uint8_Box (BD_Shape_long_double *y*) [inline]

Definition at line 180 of file Uint8_Box.java.

References build_cpp_object().

The documentation for this class was generated from the following file:

- Uint8_Box.java

11.150 parma_polyhedra_library::Variable Class Reference

A dimension of the vector space.

Public Member Functions

- Variable (int i)

  Builds the variable corresponding to the Cartesian axis of index `i`.

- int id ()

  Returns the index of the Cartesian axis associated to `this`.

- int compareTo (Variable v)

  Returns a negative number if `this` comes first than `v`, a zero if `this` equals `v`, a positive number if if `this` comes first than `v`.

Static Package Functions

- [static initializer]

Static Private Member Functions

- static native void initIDs ()

Private Attributes

- int varid

  The index of the Cartesian axis.

11.150.1 Detailed Description

A dimension of the vector space. An object of the class Variable represents a dimension of the space, that is one of the Cartesian axes. Variables are used as basic blocks in order to build more complex linear expressions. Each variable is identified by a non-negative integer, representing the index of the corresponding Cartesian axis (the first axis has index 0).

Definition at line 38 of file Variable.java.

11.150.2 Constructor & Destructor Documentation

11.150.2.1 parma_polyhedra_library::Variable::Variable (int *i*) [inline]

Builds the variable corresponding to the Cartesian axis of index `i`.

Exceptions

RuntimeErrorException Thrown if `i` is has negative value.

Definition at line 47 of file Variable.java.

References varid.

11.150.3 Member Function Documentation

11.150.3.1 parma_polyhedra_library::Variable::[static initializer] () [inline, static, package]

11.150.3.2 int parma_polyhedra_library::Variable::compareTo (Variable *v*) [inline]

Returns a negative number if `this` comes first than `v`, a zero if `this` equals `v`, a positive number if if `this` comes first than `v`.

Definition at line 67 of file Variable.java.

References varid.

11.150.3.3 int parma_polyhedra_library::Variable::id () [inline]

Returns the index of the Cartesian axis associated to `this`.

Definition at line 58 of file Variable.java.

References varid.

Referenced by parma_polyhedra_library::Linear_Expression_Variable::Linear_Expression_Variable(), and parma_polyhedra_library::Linear_Expression_Variable::var_id().

11.150.4 Member Data Documentation

11.150.4.1 int parma_polyhedra_library::Variable::varid [private]

The index of the Cartesian axis.

Definition at line 40 of file Variable.java.

Referenced by compareTo(), id(), and Variable().

The documentation for this class was generated from the following file:

- Variable.java

11.151 parma_polyhedra_library::Variables_Set Class Reference

A java.util.TreeSet of variables' indexes.

Public Member Functions

- Variables_Set ()

  Builds the empty set of variable indexes.

Static Package Functions

- [static initializer]

Static Private Member Functions

- static native void initIDs ()

11.151.1 Detailed Description

A java.util.TreeSet of variables' indexes.

Definition at line 27 of file Variables_Set.java.

11.151.2 Constructor & Destructor Documentation

11.151.2.1 parma_polyhedra_library::Variables_Set::Variables_Set () [inline]

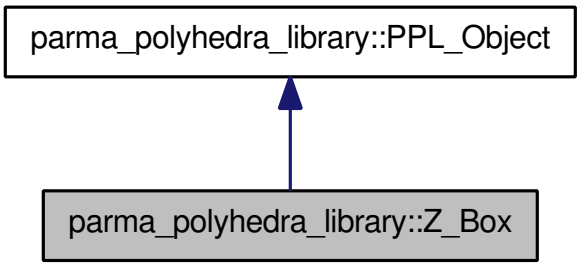
Builds the empty set of variable indexes.

Definition at line 30 of file Variables_Set.java.

11.151.3 Member Function Documentation

11.151.3.1 parma_polyhedra_library::Variables_Set::[static initializer] () [inline, static, package]

11.151.3.2 static native void parma_polyhedra_library::Variables_Set::initIDs () [static, private]



The documentation for this class was generated from the following file:

11.152.1 Detailed Description

Java class interfacing C++ Parma_Polyhedra_Library::Z_Box.

Definition at line 33 of file Z_Box.java.

11.152.2 Constructor & Destructor Documentation

11.152.2.1 parma_polyhedra_library::Z_Box::Z_Box (long *num_dimensions*, Degenerate_Element *kind*) [inline]

Definition at line 40 of file Z_Box.java.

References build_cpp_object().

11.152.2.2 parma_polyhedra_library::Z_Box::Z_Box () [inline, private]

Definition at line 45 of file Z_Box.java.

11.152.2.3 parma_polyhedra_library::Z_Box::Z_Box (Int8_Box *y*) [inline]

Definition at line 52 of file Z_Box.java.

References build_cpp_object().

11.152.2.4 parma_polyhedra_library::Z_Box::Z_Box (Int16_Box *y*) [inline]

Definition at line 56 of file Z_Box.java.

References build_cpp_object().

11.152.2.5 parma_polyhedra_library::Z_Box::Z_Box (Int32_Box *y*) [inline]

Definition at line 60 of file Z_Box.java.

References build_cpp_object().

11.152.2.6 parma_polyhedra_library::Z_Box::Z_Box (Int64_Box *y*) [inline]

Definition at line 64 of file Z_Box.java.

References build_cpp_object().

11.152.2.7 parma_polyhedra_library::Z_Box::Z_Box (Uint8_Box *y*) [inline]

Definition at line 68 of file Z_Box.java.

References build_cpp_object().

11.152.2.8 parma_polyhedra_library::Z_Box::Z_Box (Uint16_Box *y*) [inline]

Definition at line 72 of file Z_Box.java.

References build_cpp_object().

11.152.2.9 parma_polyhedra_library::Z_Box::Z_Box (Uint32_Box *y*) [inline]

Definition at line 76 of file Z_Box.java.

References build_cpp_object().

11.152.2.10 parma_polyhedra_library::Z_Box::Z_Box (Uint64_Box *y*) [inline]

Definition at line 80 of file Z_Box.java.

References build_cpp_object().

11.152.2.11 parma_polyhedra_library::Z_Box::Z_Box (Z_Box *y*) [inline]

Definition at line 84 of file Z_Box.java.

References build_cpp_object().

11.152.2.12 parma_polyhedra_library::Z_Box::Z_Box (Rational_Box *y*) [inline]

Definition at line 88 of file Z_Box.java.

References build_cpp_object().

11.152.2.13 parma_polyhedra_library::Z_Box::Z_Box (BD_Shape_int8_t *y*) [inline]

Definition at line 92 of file Z_Box.java.

References build_cpp_object().

11.152.2.14 parma_polyhedra_library::Z_Box::Z_Box (BD_Shape_int16_t *y*) [inline]

Definition at line 96 of file Z_Box.java.

References build_cpp_object().

11.152.2.15 parma_polyhedra_library::Z_Box::Z_Box (BD_Shape_int32_t *y*) [inline]

Definition at line 100 of file Z_Box.java.

References build_cpp_object().

11.152.2.16 parma_polyhedra_library::Z_Box::Z_Box (BD_Shape_int64_t *y*) [inline]

Definition at line 104 of file Z_Box.java.

References build_cpp_object().

11.152.2.17 parma_polyhedra_library::Z_Box::Z_Box (BD_Shape_mpz_class *y*) [inline]

Definition at line 108 of file Z_Box.java.

References build_cpp_object().

11.152.2.18 parma_polyhedra_library::Z_Box::Z_Box (BD_Shape_mpq_class *y*) [inline]

Definition at line 112 of file Z_Box.java.

References build_cpp_object().

11.152.2.19 parma_polyhedra_library::Z_Box::Z_Box (Octagonal_Shape_int8_t *y*) [inline]

Definition at line 116 of file Z_Box.java.

References build_cpp_object().

11.152.2.20 parma_polyhedra_library::Z_Box::Z_Box (Octagonal_Shape_int16_t *y*) [inline]

Definition at line 120 of file Z_Box.java.

References build_cpp_object().

11.152.2.21 parma_polyhedra_library::Z_Box::Z_Box (Octagonal_Shape_int32_t *y*) [inline]

Definition at line 124 of file Z_Box.java.

References build_cpp_object().

11.152.2.22 parma_polyhedra_library::Z_Box::Z_Box (Octagonal_Shape_int64_t *y*) [inline]

Definition at line 128 of file Z_Box.java.

References build_cpp_object().

11.152.2.23 parma_polyhedra_library::Z_Box::Z_Box (Octagonal_Shape_mpz_class *y*) [inline]

Definition at line 132 of file Z_Box.java.

References build_cpp_object().

11.152.2.24 parma_polyhedra_library::Z_Box::Z_Box (Octagonal_Shape_mpq_class *y*) [inline]

Definition at line 136 of file Z_Box.java.

References build_cpp_object().

11.152.2.25 parma_polyhedra_library::Z_Box::Z_Box (C_Polyhedron *y*) [inline]

Definition at line 140 of file Z_Box.java.

References build_cpp_object().

11.152.2.26 parma_polyhedra_library::Z_Box::Z_Box (NNC_Polyhedron *y*) [inline]

Definition at line 144 of file Z_Box.java.

References build_cpp_object().

- Z_Box.java

12 File Documentation

12.1 Artificial_Parameter.java File Reference

Classes

- class parma_polyhedra_library::Artificial_Parameter

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.2 Artificial_Parameter_Sequence.java File Reference

Classes

- class parma_polyhedra_library::Artificial_Parameter_Sequence

A sequence of artificial parameters.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.3 BD_Shape_double.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_double

  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<double>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.4 BD_Shape_float.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_float

  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<float>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.5 BD_Shape_int16_t.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_int16_t

  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<int16_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.6 BD_Shape_int32_t.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_int32_t

  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<int32_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.7 BD_Shape_int64_t.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_int64_t

  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<int64_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.8 BD_Shape_int8_t.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_int8_t

  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<int8_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.9 BD_Shape_long_double.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_long_double
  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<long double>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.10 BD_Shape_mpq_class.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_mpq_class
  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<mpq_class>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.11 BD_Shape_mpz_class.java File Reference

Classes

- class parma_polyhedra_library::BD_Shape_mpz_class
  Java class interfacing C++ Parma_Polyhedra_Library::BD_Shape<mpz_class>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.12 Bounded_Integer_Type_Overflow.java File Reference

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Bounded_Integer_Type_Overflow { parma_polyhedra_library::OVERFLOW_WRAPS, parma_polyhedra_library::OVERFLOW_UNDEFINED, parma_polyhedra_library::OVERFLOW_IMPOSSIBLE }

  Overflow behavior of bounded integer types.

12.13 Bounded_Integer_Type_Representation.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Bounded_Integer_Type_Representation { parma_polyhedra_library::UNSIGNED, parma_polyhedra_library::SIGNED_2_COMPLEMENT }

  Representation of bounded integer types.

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Bounded_Integer_Type_Width {

  parma_polyhedra_library::BITS_8, parma_polyhedra_library::BITS_16, parma_polyhedra_library::BITS_32, parma_polyhedra_library::BITS_64,

  parma_polyhedra_library::BITS_128 }

  Widths of bounded integer types.

12.15 By_Reference.java File Reference

Classes

- class parma_polyhedra_library::By_Reference< T >

  An utility class implementing mutable and non-mutable call-by-reference.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.16 C_Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::C_Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::C_Polyhedron.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.17 Coefficient.java File Reference

Classes

- class parma_polyhedra_library::Coefficient

  A PPL coefficient.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.18 Complexity_Class.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Complexity_Class { parma_polyhedra_library::POLYNOMIAL_-COMPLEXITY, parma_polyhedra_library::SIMPLEX_COMPLEXITY, parma_polyhedra_-library::ANY_COMPLEXITY }

  Possible Complexities.

12.19 Congruence.java File Reference

Classes

- class parma_polyhedra_library::Congruence
  A linear congruence.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.20 Congruence_System.java File Reference

Classes

- class parma_polyhedra_library::Congruence_System
  A system of congruences.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.21 Constraint.java File Reference

Classes

- class parma_polyhedra_library::Constraint
  A linear equality or inequality.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.22 Constraint_System.java File Reference

Classes

- class parma_polyhedra_library::Constraint_System
  A system of constraints.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.23 Constraints_Product_C_Polyhedron_Grid.java File Reference

Classes

- class parma_polyhedra_library::Constraints_Product_C_Polyhedron_Grid

  Java class interfacing C++ Parma_Polyhedra_Library::Constraints_Product<C_Polyhedron,Grid>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.24 Constraints_Product_Grid_C_Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::Constraints_Product_Grid_C_Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::Constraints_Product<Grid,C_Polyhedron>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.25 Constraints_Product_Grid_NNC_Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::Constraints_Product_Grid_NNC_Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::Constraints_Product<Grid,NNC_Polyhedron>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.26 Constraints_Product_NNC_Polyhedron_Grid.java File Reference

Classes

- class parma_polyhedra_library::Constraints_Product_NNC_Polyhedron_Grid

  Java class interfacing C++ Parma_Polyhedra_Library::Constraints_Product<NNC_Polyhedron,Grid>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.27 Control_Parameter_Name.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Control_Parameter_Name { parma_polyhedra_library::PRICING }

  Names of MIP problems' control parameters.

12.28 Control_Parameter_Value.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Control_Parameter_Value { parma_polyhedra_library::PRICING_STEEPEST_EDGE_FLOAT, parma_polyhedra_library::PRICING_STEEPEST_EDGE_EXACT, parma_polyhedra_library::PRICING_TEXTBOOK }

  Possible values for MIP problem's control parameters.

12.29 Degenerate_Element.java File Reference

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Degenerate_Element { parma_polyhedra_library::UNIVERSE, parma_polyhedra_library::EMPTY }
  Kinds of degenerate abstract elements.

12.30 Domain_Error_Exception.java File Reference

Classes

- class parma_polyhedra_library::Domain_Error_Exception
  Exceptions caused by domain errors.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.31 Double_Box.java File Reference

Classes

- class parma_polyhedra_library::Double_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Double_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.32 fdl.dox File Reference

12.33 Float_Box.java File Reference

Classes

- class parma_polyhedra_library::Float_Box

Java class interfacing C++ Parma_Polyhedra_Library::Float_Box.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.34 Generator.java File Reference

Classes

- class parma_polyhedra_library::Generator

  A line, ray, point or closure point.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.35 Generator_System.java File Reference

Classes

- class parma_polyhedra_library::Generator_System

  A system of generators.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.36 Generator_Type.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Generator_Type { parma_polyhedra_library::LINE, parma_polyhedra_library::RAY, parma_polyhedra_library::POINT, parma_polyhedra_library::CLOSURE_POINT }

  The generator type.

12.37 gpl.dox File Reference

12.38 Grid.java File Reference

Classes

- class parma_polyhedra_library::Grid

  Java class interfacing C++ Parma_Polyhedra_Library::Grid.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.39 Grid_Generator.java File Reference

Classes

- class parma_polyhedra_library::Grid_Generator

  A grid line, parameter or grid point.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.40 Grid_Generator_System.java File Reference

Classes

- class parma_polyhedra_library::Grid_Generator_System

  A system of grid generators.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.41 Grid_Generator_Type.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Grid_Generator_Type { parma_polyhedra_library::LINE, parma_polyhedra_library::PARAMETER, parma_polyhedra_library::POINT }

  The grid generator type.

12.42 Int16_Box.java File Reference

Classes

- class parma_polyhedra_library::Int16_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Int16_Box.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.43 Int32_Box.java File Reference

Classes

- class parma_polyhedra_library::Int32_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Int32_Box.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.44 Int64_Box.java File Reference

Classes

- class parma_polyhedra_library::Int64_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Int64_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.45 Int8_Box.java File Reference

Classes

- class parma_polyhedra_library::Int8_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Int8_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.46 Invalid_Argument_Exception.java File Reference

Classes

- class parma_polyhedra_library::Invalid_Argument_Exception
  Exceptions caused by invalid arguments.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.47 IO.java File Reference

Classes

- class parma_polyhedra_library::IO
  A class collecting I/O functions.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.48 Length_Error_Exception.java File Reference

Classes

- class parma_polyhedra_library::Length_Error_Exception

  Exceptions caused by too big length/size values.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.49 Linear_Expression.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression

  A linear expression.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.50 Linear_Expression_Coefficient.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression_Coefficient

  A linear expression built from a coefficient.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.51 Linear_Expression_Difference.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression_Difference
  The difference of two linear expressions.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.52 Linear_Expression_Sum.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression_Sum
  The sum of two linear expressions.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.53 Linear_Expression_Times.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression_Times
  The product of a linear expression and a coefficient.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.54 Linear_Expression_Unary_Minus.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression_Unary_Minus
  The negation of a linear expression.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.55 Linear_Expression_Variable.java File Reference

Classes

- class parma_polyhedra_library::Linear_Expression_Variable

  A linear expression built from a variable.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.56 Logic_Error_Exception.java File Reference

Classes

- class parma_polyhedra_library::Logic_Error_Exception

  Exceptions due to errors in low-level routines.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.57 Long_Double_Box.java File Reference

Classes

- class parma_polyhedra_library::Long_Double_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Long_Double_Box.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.58 MIP_Problem.java File Reference

Classes

- class parma_polyhedra_library::MIP_Problem

  A Mixed Integer (linear) Programming problem.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.59 MIP_Problem_Status.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::MIP_Problem_Status { parma_polyhedra_library::UNFEASIBLE_MIP_PROBLEM, parma_polyhedra_library::UNBOUNDED_MIP_PROBLEM, parma_polyhedra_library::OPTIMIZED_MIP_PROBLEM }

  Possible outcomes of the MIP_Problem solver.

12.60 NNC_Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::NNC_Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::NNC_Polyhedron.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.61 Octagonal_Shape_double.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_double

Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<double>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.62 Octagonal_Shape_float.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_float

  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<float>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.63 Octagonal_Shape_int16_t.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_int16_t

  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<int16_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.64 Octagonal_Shape_int32_t.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_int32_t

  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<int32_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.65 Octagonal_Shape_int64_t.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_int64_t

  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<int64_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.66 Octagonal_Shape_int8_t.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_int8_t

  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<int8_t>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.67 Octagonal_Shape_long_double.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_long_double

  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<long double>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.68 Octagonal_Shape_mpq_class.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_mpq_class
  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<mpq_class>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.69 Octagonal_Shape_mpz_class.java File Reference

Classes

- class parma_polyhedra_library::Octagonal_Shape_mpz_class
  Java class interfacing C++ Parma_Polyhedra_Library::Octagonal_Shape<mpz_class>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.70 Optimization_Mode.java File Reference

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Optimization_Mode { parma_polyhedra_library::MINIMIZATION, parma_polyhedra_library::MAXIMIZATION }
  Possible optimization modes.

12.71 Overflow_Error_Exception.java File Reference

Classes

- class parma_polyhedra_library::Overflow_Error_Exception
  Exceptions due to overflow errors.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.72 Pair.java File Reference

Classes

- class parma_polyhedra_library::Pair< K, V >

  A pair of values of type K and V.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.73 Parma_Polyhedra_Library.java File Reference

Classes

- class parma_polyhedra_library::Parma_Polyhedra_Library

  A class collecting library-level functions.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.74 Partial_Function.java File Reference

Classes

- class parma_polyhedra_library::Partial_Function

  A partial function on space dimension indices.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.75 PIP_Decision_Node.java File Reference

Classes

- class parma_polyhedra_library::PIP_Decision_Node
  An internal node of the PIP solution tree.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.76 PIP_Problem.java File Reference

Classes

- class parma_polyhedra_library::PIP_Problem
  A Parametric Integer Programming problem.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.77 PIP_Problem_Control_Parameter_Name.java File Reference

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::PIP_Problem_Control_Parameter_Name { parma_polyhedra_library::CUTTING_STRATEGY, parma_polyhedra_library::PIVOT_ROW_STRATEGY }
  Names of PIP problems' control parameters.

12.78 PIP_Problem_Control_Parameter_Value.java File Reference

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::PIP_Problem_Control_Parameter_Value {

  parma_polyhedra_library::CUTTING_STRATEGY_FIRST, parma_polyhedra_library::CUTTING_STRATEGY_DEEPEST, parma_polyhedra_library::CUTTING_STRATEGY_ALL, parma_polyhedra_library::PIVOT_ROW_STRATEGY_FIRST,

  parma_polyhedra_library::PIVOT_ROW_STRATEGY_MAX_COLUMN }

  Possible values for PIP problems' control parameters.

12.79 PIP_Problem_Status.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::PIP_Problem_Status { parma_polyhedra_library::UNFEASIBLE_PIP_PROBLEM, parma_polyhedra_library::OPTIMIZED_PIP_PROBLEM }

  Possible outcomes of the PIP_Problem solver.

12.80 PIP_Solution_Node.java File Reference

Classes

- class parma_polyhedra_library::PIP_Solution_Node

  A leaf node of the PIP solution tree.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.81 PIP_Tree_Node.java File Reference

Classes

- class parma_polyhedra_library::PIP_Tree_Node

  A node of the PIP solution tree.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.82 Pointset_Powerset_BD_Shape_double.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_double

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<double> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.83 Pointset_Powerset_BD_Shape_double_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_double_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<double> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.84 Pointset_Powerset_BD_Shape_float.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_float

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<float> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.85 Pointset_Powerset_BD_Shape_float_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_float_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<float> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.86 Pointset_Powerset_BD_Shape_int16_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int16_t

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int16_t> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.87 Pointset_Powerset_BD_Shape_int16_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int16_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int16_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.88 Pointset_Powerset_BD_Shape_int32_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int32_t

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int32_t> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.89 Pointset_Powerset_BD_Shape_int32_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int32_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int32_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.90 Pointset_Powerset_BD_Shape_int64_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int64_t

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int64_t> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.91 Pointset_Powerset_BD_Shape_int64_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int64_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int64_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.92 Pointset_Powerset_BD_Shape_int8_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int8_t> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.93 Pointset_Powerset_BD_Shape_int8_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_int8_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<int8_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.94 Pointset_Powerset_BD_Shape_long_double.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<long double> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.95 Pointset_Powerset_BD_Shape_long_double_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_long_double_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<long double> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.96 Pointset_Powerset_BD_Shape_mpq_class.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_mpq_class

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<mpq_class> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.97 Pointset_Powerset_BD_Shape_mpq_class_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_mpq_class_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<mpq_class> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.98 Pointset_Powerset_BD_Shape_mpz_class.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_mpz_class

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<mpz_class> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.99 Pointset_Powerset_BD_Shape_mpz_class_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_BD_Shape_mpz_class_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<BD_Shape<mpz_class> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.100 Pointset_Powerset_C_Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_C_Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<C_Polyhedron>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.101 Pointset_Powerset_C_Polyhedron_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_C_Polyhedron_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<C_Polyhedron>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.102 Pointset_Powerset_Double_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Double_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Double_Box>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.103 Pointset_Powerset_Double_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Double_Box_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Double_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.104 Pointset_Powerset_Float_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Float_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Float_Box>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.105 Pointset_Powerset_Float_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Float_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Float_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.106 Pointset_Powerset_Grid.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Grid
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Grid>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.107 Pointset_Powerset_Grid_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Grid_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Grid>:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.108 Pointset_Powerset_Int16_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int16_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int16_Box>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.109 Pointset_Powerset_Int16_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int16_Box_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int16_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.110 Pointset_Powerset_Int32_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int32_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int32_Box>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.111 Pointset_Powerset_Int32_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int32_Box_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int32_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.112 Pointset_Powerset_Int64_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int64_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int64_Box>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.113 Pointset_Powerset_Int64_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int64_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int64_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.114 Pointset_Powerset_Int8_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int8_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int8_Box>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.115 Pointset_Powerset_Int8_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Int8_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Int8_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.116 Pointset_Powerset_Long_Double_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Long_Double_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Long_Double_Box>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.117 Pointset_Powerset_Long_Double_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Long_Double_Box_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Long_Double_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.118 Pointset_Powerset_NNC_Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_NNC_Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<NNC_Polyhedron>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.119 Pointset_Powerset_NNC_Polyhedron_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_NNC_Polyhedron_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<NNC_Polyhedron>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.120 Pointset_Powerset_Octagonal_Shape_double.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_double

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<double> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.121 Pointset_Powerset_Octagonal_Shape_double_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_double_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<double> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.122 Pointset_Powerset_Octagonal_Shape_float.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_float

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<float> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.123 Pointset_Powerset_Octagonal_Shape_float_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_float_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<float> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.124 Pointset_Powerset_Octagonal_Shape_int16_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int16_t> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.125 Pointset_Powerset_Octagonal_Shape_int16_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int16_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int16_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.126 Pointset_Powerset_Octagonal_Shape_int32_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int32_t
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int32_t> >

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.127 Pointset_Powerset_Octagonal_Shape_int32_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int32_t_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int32_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.128 Pointset_Powerset_Octagonal_Shape_int64_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int64_t
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int64_t> >

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.129 Pointset_Powerset_Octagonal_Shape_int64_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int64_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int64_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.130 Pointset_Powerset_Octagonal_Shape_int8_t.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int8_t

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int8_t> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.131 Pointset_Powerset_Octagonal_Shape_int8_t_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_int8_t_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<int8_t> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.132 Pointset_Powerset_Octagonal_Shape_long_double.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_long_double

Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<long double> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.133 Pointset_Powerset_Octagonal_Shape_long_double_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_long_double_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<long double> >:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.134 Pointset_Powerset_Octagonal_Shape_mpq_class.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_mpq_class

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<mpq_class> >

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.135 Pointset_Powerset_Octagonal_Shape_mpq_class_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_mpq_class_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<mpq_class> >:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.136 Pointset_Powerset_Octagonal_Shape_mpz_class.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_mpz_class
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<mpz_class> >

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.137 Pointset_Powerset_Octagonal_Shape_mpz_class_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Octagonal_Shape_mpz_class_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Octagonal_Shape<mpz_class> >:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.138 Pointset_Powerset_Rational_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Rational_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Rational_Box>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.139 Pointset_Powerset_Rational_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Rational_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Rational_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.140 Pointset_Powerset_Uint16_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint16_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint16_Box>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.141 Pointset_Powerset_Uint16_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint16_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint16_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.142 Pointset_Powerset_Uint32_Box.java File Reference

Classes

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint32_Box_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint32_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.144 Pointset_Powerset_Uint64_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint64_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint64_Box>

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.145 Pointset_Powerset_Uint64_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint64_Box_Iterator

  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint64_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.146 Pointset_Powerset_Uint8_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint8_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint8_Box>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.147 Pointset_Powerset_Uint8_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Uint8_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Uint8_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.148 Pointset_Powerset_Z_Box.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Z_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Z_Box>

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.149 Pointset_Powerset_Z_Box_Iterator.java File Reference

Classes

- class parma_polyhedra_library::Pointset_Powerset_Z_Box_Iterator
  Java class interfacing C++ Parma_Polyhedra_Library::Pointset_Powerset<Z_Box>:: iterator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.150 Poly_Con_Relation.java File Reference

Classes

- class parma_polyhedra_library::Poly_Con_Relation

  The relation between a polyhedron and a constraint.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.151 Poly_Gen_Relation.java File Reference

Classes

- class parma_polyhedra_library::Poly_Gen_Relation

  The relation between a polyhedron and a generator.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

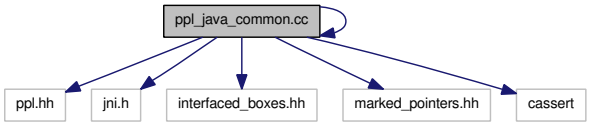
12.152 Polyhedron.java File Reference

Classes

- class parma_polyhedra_library::Polyhedron

  Java class interfacing C++ Parma_Polyhedra_Library::Polyhedron.

Namespaces



- namespace parma_polyhedra_library

  The PPL Java interface package.

- void Parma_Polyhedra_Library::Interfaces::Java::reset_deterministic_timeout ()
- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_poly_gen_relation (JNIEnv *env, Poly_Gen_Relation &r)

  Builds a Java parma_polyhedra_library::Poly_Gen_Relation from C++ Poly_Gen_Relation `r`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_poly_con_relation (JNIEnv *env, Poly_Con_Relation &r)

  Builds a Java parma_polyhedra_library::Poly_Con_Relation from C++ Poly_Con_Relation `r`.

- Congruence Parma_Polyhedra_Library::Interfaces::Java::build_cxx_congruence (JNIEnv *env, jobject j_cg)

  Builds a C++ Congruence from Java parma_polyhedra_library::Congruence `j_cg`.

- PIP_Tree_Node::Artificial_Parameter Parma_Polyhedra_Library::Interfaces::Java::build_cxx_artificial_parameter (JNIEnv *env, jobject j_ap)

  Builds a C++ Artificial_Parameter from Java parma_polyhedra_library::Artificial_Parameter `j_artificial_parameter`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::bool_to_j_boolean_class (JNIEnv *env, const bool value)

  Builds a Java Boolean from C++ bool `value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::j_long_to_j_long_class (JNIEnv *env, jlong value)

  Builds a Java Long from Java long `value`.

- jlong Parma_Polyhedra_Library::Interfaces::Java::j_long_class_to_j_long (JNIEnv *env, jobject j_long)

  Returns the Java long stored in Java Long `j_long`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::j_int_to_j_integer (JNIEnv *env, jint value)

  Builds a Java Integer from Java int `value`.

- jint Parma_Polyhedra_Library::Interfaces::Java::j_integer_to_j_int (JNIEnv *env, jobject j_integer)

  Returns the Java int stored in Java Integer `j_integer`.

- Variables_Set Parma_Polyhedra_Library::Interfaces::Java::build_cxx_variables_set (JNIEnv *env, jobject v_set)

  Builds a C++ Variables_Set from Java parma_polyhedra_library::Variables_Set `v_set`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_variables_set (JNIEnv *env, const Variables_Set &v_set)

  Builds a Java parma_polyhedra_library::Variables_Set from C++ Variables_Set `v_set`.

- Bounded_Integer_Type_Overflow Parma_Polyhedra_Library::Interfaces::Java::build_cxx_bounded_overflow (JNIEnv *env, jobject j_bounded_overflow)

  Builds a C++ Bounded_Integer_Type_Overflow from Java parma_polyhedra_library::Bounded_Integer_Type_Overflow `j_bounded_overflow`.

- Bounded_Integer_Type_Representation Parma_Polyhedra_Library::Interfaces::Java::build_cxx_bounded_rep (JNIEnv *env, jobject j_bounded_rep)

  Builds a C++ Bounded_Integer_Type_Representation from Java parma_polyhedra_library::Bounded_Integer_Type_Representation `j_bounded_rep`.

- Bounded_Integer_Type_Width Parma_Polyhedra_Library::Interfaces::Java::build_cxx_bounded_width (JNIEnv *env, jobject j_bounded_width)

  Builds a C++ Bounded_Integer_Type_Width from Java parma_polyhedra_library::Bounded_Integer_Type_Width `j_bounded_width`.

- Relation_Symbol Parma_Polyhedra_Library::Interfaces::Java::build_cxx_relsym (JNIEnv *env, jobject j_relsym)

  Builds a C++ Relation_Symbol from Java parma_polyhedra_library::Relation_Symbol `j_relsym`.

- Optimization_Mode Parma_Polyhedra_Library::Interfaces::Java::build_cxx_optimization_mode (JNIEnv *env, jobject j_opt_mode)

  Builds a C++ Optimization_Mode from Java parma_polyhedra_library::Optimization_Mode `j_opt_mode`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_mip_status (JNIEnv *env, const MIP_Problem_Status &mip_status)

  Builds a Java parma_polyhedra_library::MIP_Problem_Status from C++ MIP_Problem_Status `mip_status`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_pip_status (JNIEnv *env, const PIP_Problem_Status &pip_status)

  Builds a Java parma_polyhedra_library::PIP_Problem_Status from C++ PIP_Problem_Status `pip_status`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_optimization_mode (JNIEnv *env, const Optimization_Mode &opt_mode)

  Builds a Java parma_polyhedra_library::Optimization_Mode from C++ Optimization_Mode `opt_mode`.

- MIP_Problem::Control_Parameter_Name Parma_Polyhedra_Library::Interfaces::Java::build_cxx_control_parameter_name (JNIEnv *env, jobject j_cp_name)

  Builds a C++ MIP_Problem::Control_Parameter_Name from Java parma_polyhedra_library::Control_Parameter_Name `j_cp_name`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_control_parameter_name (JNIEnv *env, const MIP_Problem::Control_Parameter_Name &cp_name)

  Builds a Java parma_polyhedra_library::Control_Parameter_Name from C++ MIP_Problem::Control_Parameter_Name `cp_name`.

- MIP_Problem::Control_Parameter_Value Parma_Polyhedra_Library::Interfaces::Java::build_cxx_control_parameter_value (JNIEnv *env, jobject j_cp_value)

  Builds a C++ MIP_Problem::Control_Parameter_Value from Java parma_polyhedra_library::Control_Parameter_Value `j_cp_value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_control_parameter_value (JNIEnv *env, const MIP_Problem::Control_Parameter_Value &cp_value)

  Builds a Java parma_polyhedra_library::Control_Parameter_Value from C++ MIP_Problem::Control_Parameter_Value `cp_value`.

- PIP_Problem::Control_Parameter_Name Parma_Polyhedra_Library::Interfaces::Java::build_cxx_-pip_problem_control_parameter_name (JNIEnv *env, jobject j_cp_name)

  Builds a C++ PIP_Problem::Control_Parameter_Name from Java parma_polyhedra_library::PIP_-Problem_Control_Parameter_Name `j_cp_name`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_pip_problem_java_control_parameter_-name (JNIEnv *env, const PIP_Problem::Control_Parameter_Name &cp_name)
- PIP_Problem::Control_Parameter_Value Parma_Polyhedra_Library::Interfaces::Java::build_cxx_-pip_problem_control_parameter_value (JNIEnv *env, jobject j_cp_value)

  Builds a C++ PIP_Problem::Control_Parameter_Value from Java parma_polyhedra_library::PIP_-Problem_Control_Parameter_Value `j_cp_value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_pip_problem_control_parameter_-value (JNIEnv *env, const PIP_Problem::Control_Parameter_Value &cp_value)

  Builds a Java parma_polyhedra_library::Control_Parameter_Value from C++ PIP_Problem::Control_-Parameter_Value `cp_value`.

- Constraint Parma_Polyhedra_Library::Interfaces::Java::build_cxx_constraint (JNIEnv *env, jobject j_constraint)

  Builds a C++ Constraint from Java parma_polyhedra_library::Constraint `j_constraint`.

- Linear_Expression Parma_Polyhedra_Library::Interfaces::Java::build_cxx_linear_expression (JNIEnv *env, jobject j_le)

  Builds a C++ Linear_Expression from Java parma_polyhedra_library::Linear_Expression `j_le`.

- Generator Parma_Polyhedra_Library::Interfaces::Java::build_cxx_generator (JNIEnv *env, jobject j_g)

  Builds a C++ Generator from Java parma_polyhedra_library::Generator `j_g`.

- Grid_Generator Parma_Polyhedra_Library::Interfaces::Java::build_cxx_grid_generator (JNIEnv *env, jobject j_g)

  Builds a C++ Grid_Generator from Java parma_polyhedra_library::Grid_Generator `j_g`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_linear_expression_coefficient (JNIEnv *env, const Coefficient &coeff)

  Builds a Java parma_polyhedra_library::Linear_Expression_Coefficient from C++ Coefficient `coeff`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_generator (JNIEnv *env, jobject dst, jobject src)

  Sets Java parma_polyhedra_library::Generator `dst` *to have the same value as* `src`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_pair_element (JNIEnv *env, jobject dst_pair, int arg, jobject src)

  Assigns `src` *to one of the fields of parma_polyhedra_library::Pair object* `dst_pair`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::get_pair_element (JNIEnv *env, int arg, jobject pair)

  Returns one of the fields of the parma_polyhedra_library::Pair object `pair`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_constraint (JNIEnv *env, const Constraint &c)

Builds a Java parma_polyhedra_library::Constraint from C++ Constraint `c`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_congruence (JNIEnv *env, const Congruence &cg)

  Builds a Java parma_polyhedra_library::Congruence from C++ Congruence `cg`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_generator (JNIEnv *env, const Generator &g)

  Builds a Java parma_polyhedra_library::Generator from C++ Generator `g`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_grid_generator (JNIEnv *env, const Grid_Generator &g)

  Builds a Java parma_polyhedra_library::Grid_Generator from C++ Grid_Generator `g`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_constraint_system (JNIEnv *env, const Constraint_System &cs)

  Builds a Java parma_polyhedra_library::Constraint_System from C++ Constraint_System `cs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_generator_system (JNIEnv *env, const Generator_System &gs)

  Builds a Java parma_polyhedra_library::Generator_System from C++ Generator_System `gs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_grid_generator_system (JNIEnv *env, const Grid_Generator_System &gs)

  Builds a Java parma_polyhedra_library::Grid_Generator_System from C++ Grid_Generator_System `gs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_congruence_system (JNIEnv *env, const Congruence_System &cgs)

  Builds a Java parma_polyhedra_library::Congruence_System from C++ Congruence_System `cgs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_artificial_parameter (JNIEnv *env, const PIP_Tree_Node::Artificial_Parameter &ap)

  Builds a Java parma_polyhedra_library::Artificial_Parameter from C++ Artificial_Parameter `ap`.

Variables

- Java_Class_Cache Parma_Polyhedra_Library::Interfaces::Java::cached_classes

  The cached class references.

- Java_FMID_Cache Parma_Polyhedra_Library::Interfaces::Java::cached_FMIDs

  The field and method ID cache.

12.154 ppl_java_common.defs.hh File Reference

- void Parma_Polyhedra_Library::Interfaces::Java::handle_exception (JNIEnv *env)
- template<typename U , typename V >
  U Parma_Polyhedra_Library::Interfaces::Java::jtype_to_unsigned (const V &value)

  Builds an unsigned C++ number from the Java native number `value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::bool_to_j_boolean_class (JNIEnv *env, const bool value)

  Builds a Java Boolean from C++ bool `value`.

- jint Parma_Polyhedra_Library::Interfaces::Java::j_integer_to_j_int (JNIEnv *env, jobject j_integer)

  Returns the Java int stored in Java Integer `j_integer`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::j_int_to_j_integer (JNIEnv *env, jint value)

  Builds a Java Integer from Java int `value`.

- jlong Parma_Polyhedra_Library::Interfaces::Java::j_long_class_to_j_long (JNIEnv *env, jobject j_long)

  Returns the Java long stored in Java Long `j_long`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::j_long_to_j_long_class (JNIEnv *env, jlong value)

  Builds a Java Long from Java long `value`.

- bool Parma_Polyhedra_Library::Interfaces::Java::is_java_marked (JNIEnv *env, jobject ppl_-object)

  Returns `true` *if and only if the Java object* `ppl_object` *refers to a C++ object.*

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_poly_gen_relation (JNIEnv *env, Poly_Gen_Relation &r)

  Builds a Java parma_polyhedra_library::Poly_Gen_Relation from C++ Poly_Gen_Relation `r`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_poly_con_relation (JNIEnv *env, Poly_Con_Relation &r)

  Builds a Java parma_polyhedra_library::Poly_Con_Relation from C++ Poly_Con_Relation `r`.

- Variables_Set Parma_Polyhedra_Library::Interfaces::Java::build_cxx_variables_set (JNIEnv *env, jobject v_set)

  Builds a C++ Variables_Set from Java parma_polyhedra_library::Variables_Set `v_set`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_variables_set (JNIEnv *env, const Variables_Set &v_set)

  Builds a Java parma_polyhedra_library::Variables_Set from C++ Variables_Set `v_set`.

- Relation_Symbol Parma_Polyhedra_Library::Interfaces::Java::build_cxx_relsym (JNIEnv *env, jobject j_relsym)

  Builds a C++ Relation_Symbol from Java parma_polyhedra_library::Relation_Symbol `j_relsym`.

- Bounded_Integer_Type_Overflow Parma_Polyhedra_Library::Interfaces::Java::build_cxx_-bounded_overflow (JNIEnv *env, jobject j_bounded_overflow)

  Builds a C++ Bounded_Integer_Type_Overflow from Java parma_polyhedra_library::Bounded_Integer_-Type_Overflow `j_bounded_overflow`.

- Bounded_Integer_Type_Width Parma_Polyhedra_Library::Interfaces::Java::build_cxx_bounded_-width (JNIEnv *env, jobject j_bounded_width)

  Builds a C++ Bounded_Integer_Type_Width from Java parma_polyhedra_library::Bounded_Integer_-Type_Width `j_bounded_width`.

- Bounded_Integer_Type_Representation Parma_Polyhedra_Library::Interfaces::Java::build_cxx_-bounded_rep (JNIEnv *env, jobject j_bounded_rep)

  Builds a C++ Bounded_Integer_Type_Representation from Java parma_polyhedra_library::Bounded_-Integer_Type_Representation `j_bounded_rep`.

- Optimization_Mode Parma_Polyhedra_Library::Interfaces::Java::build_cxx_optimization_mode (JNIEnv *env, jobject j_opt_mode)

  Builds a C++ Optimization_Mode from Java parma_polyhedra_library::Optimization_Mode `j_opt_-mode`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_optimization_mode (JNIEnv *env, const Optimization_Mode &opt_mode)

  Builds a Java parma_polyhedra_library::Optimization_Mode from C++ Optimization_Mode `opt_mode`.

- MIP_Problem::Control_Parameter_Name Parma_Polyhedra_Library::Interfaces::Java::build_cxx_-control_parameter_name (JNIEnv *env, jobject j_cp_name)

  Builds a C++ MIP_Problem::Control_Parameter_Name from Java parma_polyhedra_library::Control_-Parameter_Name `j_cp_name`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_control_parameter_name (JNIEnv *env, const MIP_Problem::Control_Parameter_Name &cp_name)

  Builds a Java parma_polyhedra_library::Control_Parameter_Name from C++ MIP_Problem::Control_Parameter_Name `cp_name`.

- MIP_Problem::Control_Parameter_Value Parma_Polyhedra_Library::Interfaces::Java::build_cxx_control_parameter_value (JNIEnv *env, jobject j_cp_value)

  Builds a C++ MIP_Problem::Control_Parameter_Value from Java parma_polyhedra_library::Control_Parameter_Value `j_cp_value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_control_parameter_value (JNIEnv *env, const MIP_Problem::Control_Parameter_Value &cp_value)

  Builds a Java parma_polyhedra_library::Control_Parameter_Value from C++ MIP_Problem::Control_Parameter_Value `cp_value`.

- PIP_Problem::Control_Parameter_Name Parma_Polyhedra_Library::Interfaces::Java::build_cxx_pip_problem_control_parameter_name (JNIEnv *env, jobject j_cp_name)

  Builds a C++ PIP_Problem::Control_Parameter_Name from Java parma_polyhedra_library::PIP_Problem_Control_Parameter_Name `j_cp_name`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_pip_problem_control_parameter_name (JNIEnv *env, const PIP_Problem::Control_Parameter_Name &cp_name)

  Builds a Java parma_polyhedra_library::PIP_Problem_Control_Parameter_Name from C++ PIP_Problem::Control_Parameter_Name `cp_name`.

- PIP_Problem::Control_Parameter_Value Parma_Polyhedra_Library::Interfaces::Java::build_cxx_pip_problem_control_parameter_value (JNIEnv *env, jobject j_cp_value)

  Builds a C++ PIP_Problem::Control_Parameter_Value from Java parma_polyhedra_library::PIP_Problem_Control_Parameter_Value `j_cp_value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_pip_problem_control_parameter_value (JNIEnv *env, const PIP_Problem::Control_Parameter_Value &cp_value)

  Builds a Java parma_polyhedra_library::Control_Parameter_Value from C++ PIP_Problem::Control_Parameter_Value `cp_value`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_mip_status (JNIEnv *env, const MIP_Problem_Status &mip_status)

  Builds a Java parma_polyhedra_library::MIP_Problem_Status from C++ MIP_Problem_Status `mip_status`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_pip_status (JNIEnv *env, const PIP_Problem_Status &pip_status)

  Builds a Java parma_polyhedra_library::PIP_Problem_Status from C++ PIP_Problem_Status `pip_status`.

- Variable Parma_Polyhedra_Library::Interfaces::Java::build_cxx_variable (JNIEnv *env, jobject j_var)

  Builds a C++ Variable from Java parma_polyhedra_library::Variable `j_var`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_variable (JNIEnv *env, const Variable &var)

Builds a Java parma_polyhedra_library::Variable from C++ Variable `var`.

- Coefficient Parma_Polyhedra_Library::Interfaces::Java::build_cxx_coeff (JNIEnv *env, jobject j_coeff)

  Builds a C++ Coefficient from Java parma_polyhedra_library::Coefficient `j_coeff`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_coeff (JNIEnv *env, const Coefficient &ppl_coeff)

  Builds a Java parma_polyhedra_library::Coefficient from C++ Coefficient `ppl_coeff`.

- Constraint Parma_Polyhedra_Library::Interfaces::Java::build_cxx_constraint (JNIEnv *env, jobject j_constraint)

  Builds a C++ Constraint from Java parma_polyhedra_library::Constraint `j_constraint`.

- PIP_Tree_Node::Artificial_Parameter Parma_Polyhedra_Library::Interfaces::Java::build_cxx_artificial_parameter (JNIEnv *env, jobject j_ap)

  Builds a C++ Artificial_Parameter from Java parma_polyhedra_library::Artificial_Parameter `j_artificial_parameter`.

- Linear_Expression Parma_Polyhedra_Library::Interfaces::Java::build_cxx_linear_expression (JNIEnv *env, jobject j_le)

  Builds a C++ Linear_Expression from Java parma_polyhedra_library::Linear_Expression `j_le`.

- Congruence Parma_Polyhedra_Library::Interfaces::Java::build_cxx_congruence (JNIEnv *env, jobject j_cg)

  Builds a C++ Congruence from Java parma_polyhedra_library::Congruence `j_cg`.

- Generator Parma_Polyhedra_Library::Interfaces::Java::build_cxx_generator (JNIEnv *env, jobject j_g)

  Builds a C++ Generator from Java parma_polyhedra_library::Generator `j_g`.

- Grid_Generator Parma_Polyhedra_Library::Interfaces::Java::build_cxx_grid_generator (JNIEnv *env, jobject j_g)

  Builds a C++ Grid_Generator from Java parma_polyhedra_library::Grid_Generator `j_g`.

- Grid_Generator_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_grid_generator_system (JNIEnv *env, jobject j_gs)

  Builds a C++ Grid_Generator_System from Java parma_polyhedra_library::Grid_Generator_System `j_gs`.

- Constraint_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_constraint_system (JNIEnv *env, jobject j_cs)

  Builds a C++ Constraint_System from Java parma_polyhedra_library::Constraint_System `j_cs`.

- PIP_Tree_Node::Artificial_Parameter_Sequence Parma_Polyhedra_Library::Interfaces::Java::build_cxx_artificial_parameter_sequence (JNIEnv *env, jobject j_aps)

  Builds a C++ Artificial_Parameter_Sequence from Java parma_polyhedra_library::Artificial_Parameter_Sequence `j_aps`.

- Generator_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_generator_system (JNIEnv *env, jobject j_gs)

Builds a C++ Generator_System from Java parma_polyhedra_library::Generator_System `j_gs`.

- Congruence_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_congruence_system (JNIEnv *env, jobject j_cgs)

  Builds a C++ Congruence_System from Java parma_polyhedra_library::Congruence_System `j_cgs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_constraint (JNIEnv *env, const Constraint &c)

  Builds a Java parma_polyhedra_library::Constraint from C++ Constraint `c`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_artificial_parameter (JNIEnv *env, const PIP_Tree_Node::Artificial_Parameter &ap)

  Builds a Java parma_polyhedra_library::Artificial_Parameter from C++ Artificial_Parameter `ap`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_congruence (JNIEnv *env, const Congruence &cg)

  Builds a Java parma_polyhedra_library::Congruence from C++ Congruence `cg`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_generator (JNIEnv *env, const Generator &g)

  Builds a Java parma_polyhedra_library::Generator from C++ Generator `g`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_grid_generator (JNIEnv *env, const Grid_Generator &g)

  Builds a Java parma_polyhedra_library::Grid_Generator from C++ Grid_Generator `g`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_constraint_system (JNIEnv *env, const Constraint_System &cs)

  Builds a Java parma_polyhedra_library::Constraint_System from C++ Constraint_System `cs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_artificial_parameter_sequence (JNIEnv *env, const PIP_Tree_Node::Artificial_Parameter_Sequence &aps)

  Builds a Java parma_polyhedra_library::Artificial_Parameter_Sequence from C++ Artificial_Parameter_Sequence `aps`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_grid_generator_system (JNIEnv *env, const Grid_Generator_System &gs)

  Builds a Java parma_polyhedra_library::Grid_Generator_System from C++ Grid_Generator_System `gs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_generator_system (JNIEnv *env, const Generator_System &gs)

  Builds a Java parma_polyhedra_library::Generator_System from C++ Generator_System `gs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_congruence_system (JNIEnv *env, const Congruence_System &cgs)

  Builds a Java parma_polyhedra_library::Congruence_System from C++ Congruence_System `cgs`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_linear_expression_coefficient (JNIEnv *env, const Coefficient &coeff)

  Builds a Java parma_polyhedra_library::Linear_Expression_Coefficient from C++ Coefficient `coeff`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_generator (JNIEnv *env, jobject dst, jobject src)

  Sets Java parma_polyhedra_library::Generator `dst` *to have the same value as* `src`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_coefficient (JNIEnv *env, jobject dst, jobject src)

  Sets Java Coefficient `dst` *to have the same value as* `src`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_by_reference (JNIEnv *env, jobject by_ref_dst, jobject src)

  Modifies parma_polyhedra_library::By_Reference object `by_ref_dst` *so that it references object* `src`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::get_by_reference (JNIEnv *env, jobject by_reference)

  Returns the object referenced by parma_polyhedra_library::By_Reference object `by_reference`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_pair_element (JNIEnv *env, jobject dst_pair, int arg, jobject src)

  Assigns `src` *to one of the fields of parma_polyhedra_library::Pair object* `dst_pair`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::get_pair_element (JNIEnv *env, int arg, jobject pair)

  Returns one of the fields of the parma_polyhedra_library::Pair object `pair`.

- void * Parma_Polyhedra_Library::Interfaces::Java::get_ptr (JNIEnv *env, jobject ppl_object)

  Returns a pointer to the C++ object wrapped by `ppl_object`.

- template<typename T >
  void Parma_Polyhedra_Library::Interfaces::Java::set_ptr (JNIEnv *env, jobject ppl_object, const T *address, bool to_be_marked=false)

  Sets the pointer of the underlying C++ object in the Java object.

- template<typename R >
  jobject Parma_Polyhedra_Library::Interfaces::Java::build_linear_expression (JNIEnv *env, const R &r)

  Builds a Java parma_polyhedra_library::Linear_Expression from the C++ constraint/congruence `r`.

Namespaces

- namespace Parma_Polyhedra_Library
- namespace Parma_Polyhedra_Library::Interfaces
- namespace Parma_Polyhedra_Library::Interfaces::Java

Functions

- template<typename U , typename V >
  U Parma_Polyhedra_Library::Interfaces::Java::jtype_to_unsigned (const V &value)

  Builds an unsigned C++ number from the Java native number `value`.

- template<typename T >
  void Parma_Polyhedra_Library::Interfaces::Java::set_ptr (JNIEnv *env, jobject ppl_object, const T *address, bool to_be_marked=false)

  Sets the pointer of the underlying C++ object in the Java object.

- void * Parma_Polyhedra_Library::Interfaces::Java::get_ptr (JNIEnv *env, jobject ppl_object)

  Returns a pointer to the C++ object wrapped by `ppl_object`.

- bool Parma_Polyhedra_Library::Interfaces::Java::is_java_marked (JNIEnv *env, jobject ppl_object)

  Returns `true` *if and only if the Java object* `ppl_object` *refers to a C++ object.*

- void Parma_Polyhedra_Library::Interfaces::Java::set_coefficient (JNIEnv *env, jobject dst, jobject src)

  Sets Java Coefficient `dst` *to have the same value as* `src`.

- void Parma_Polyhedra_Library::Interfaces::Java::set_by_reference (JNIEnv *env, jobject by_ref_dst, jobject src)

  Modifies parma_polyhedra_library::By_Reference object `by_ref_dst` *so that it references object* `src`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::get_by_reference (JNIEnv *env, jobject by_reference)

  Returns the object referenced by parma_polyhedra_library::By_Reference object `by_reference`.

- template<typename R >
  jobject Parma_Polyhedra_Library::Interfaces::Java::build_linear_expression (JNIEnv *env, const R &r)

Builds a Java parma_polyhedra_library::Linear_Expression from the C++ constraint/congruence `r`.

- Variable Parma_Polyhedra_Library::Interfaces::Java::build_cxx_variable (JNIEnv *env, jobject j_var)

  Builds a C++ Variable from Java parma_polyhedra_library::Variable `j_var`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_variable (JNIEnv *env, const Variable &var)

  Builds a Java parma_polyhedra_library::Variable from C++ Variable `var`.

- Coefficient Parma_Polyhedra_Library::Interfaces::Java::build_cxx_coeff (JNIEnv *env, jobject j_coeff)

  Builds a C++ Coefficient from Java parma_polyhedra_library::Coefficient `j_coeff`.

- jobject Parma_Polyhedra_Library::Interfaces::Java::build_java_coeff (JNIEnv *env, const Coefficient &ppl_coeff)

  Builds a Java parma_polyhedra_library::Coefficient from C++ Coefficient `ppl_coeff`.

- template<typename System , typename Elem_Builder >
  System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_system (JNIEnv *env, jobject j_iterable, Elem_Builder build_cxx_elem)
- Congruence_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_congruence_system (JNIEnv *env, jobject j_cgs)

  Builds a C++ Congruence_System from Java parma_polyhedra_library::Congruence_System `j_cgs`.

- Constraint_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_constraint_system (JNIEnv *env, jobject j_cs)

  Builds a C++ Constraint_System from Java parma_polyhedra_library::Constraint_System `j_cs`.

- Generator_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_generator_system (JNIEnv *env, jobject j_gs)

  Builds a C++ Generator_System from Java parma_polyhedra_library::Generator_System `j_gs`.

- Grid_Generator_System Parma_Polyhedra_Library::Interfaces::Java::build_cxx_grid_generator_system (JNIEnv *env, jobject j_gs)

  Builds a C++ Grid_Generator_System from Java parma_polyhedra_library::Grid_Generator_System `j_gs`.

12.156.1 Function Documentation

12.156.1.1 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_-Artificial_1Parameter_1Sequence_initIDs (JNIEnv ∗ *env*, jclass *j_aps_class*)

Definition at line 2112 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Artificial_Parameter_-Sequence_add_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Artificial_-Parameter_Sequence_init_ID, Parma_Polyhedra_Library::Interfaces::Java::cached_FMIDs, and CHECK_RESULT_ASSERT.

12.156.1.2 JNIEXPORT jstring JNICALL Java_parma_1polyhedra_1library_-Artificial_1Parameter_ascii_1dump (JNIEnv ∗ *env*, jobject *j_this*)

Definition at line 2087 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::build_cxx_artificial_parameter(), and CATCH_-ALL.

12.156.1.3 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_Artificial_-1Parameter_initIDs (JNIEnv ∗ *env*, jclass *j_artificial_parameter_class*)

Definition at line 2067 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Artificial_Parameter_-den_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Artificial_Parameter_init_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Artificial_Parameter_le_ID, Parma_-Polyhedra_Library::Interfaces::Java::cached_FMIDs, and CHECK_RESULT_ASSERT.

12.156.1.4 JNIEXPORT jstring JNICALL Java_parma_1polyhedra_1library_Artificial_-1Parameter_toString (JNIEnv * *env*, jobject *j_this*)

Definition at line 2101 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::build_cxx_artificial_parameter().

12.156.1.5 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_-Bounded_1Integer_1Type_1Overflow_initIDs (JNIEnv * *env*, jclass *j_bounded_overflow_class*)

Definition at line 607 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Bounded_-Integer_Type_Overflow_ordinal_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_-Cache::Bounded_Integer_Type_Overflow_OVERFLOW_IMPOSSIBLE_ID, Parma_Polyhedra_-Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_Type_Overflow_OVERFLOW_-UNDEFINED_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_-Type_Overflow_OVERFLOW_WRAPS_ID, Parma_Polyhedra_Library::Interfaces::Java::cached_-FMIDs, and CHECK_RESULT_ASSERT.

12.156.1.6 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_-Bounded_1Integer_1Type_1Representation_initIDs (JNIEnv * *env*, jclass *j_bounded_rep_class*)

Definition at line 629 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_-Type_Representation_ordinal_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_-Cache::Bounded_Integer_Type_Representation_SIGNED_2_COMPLEMENT_ID, Parma_Polyhedra_-Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_Type_Representation_UNSIGNED_ID, Parma_Polyhedra_Library::Interfaces::Java::cached_FMIDs, and CHECK_RESULT_ASSERT.

12.156.1.7 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_-Bounded_1Integer_1Type_1Width_initIDs (JNIEnv * *env*, jclass *j_bounded_width_class*)

Definition at line 647 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_Type_-Width_BITS_128_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Bounded_-Integer_Type_Width_BITS_16_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_-Cache::Bounded_Integer_Type_Width_BITS_32_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_-FMID_Cache::Bounded_Integer_Type_Width_BITS_64_ID, Parma_Polyhedra_-Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_Type_Width_BITS_8_ID, Parma_-Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::Bounded_Integer_Type_Width_ordinal_ID, Parma_Polyhedra_Library::Interfaces::Java::cached_FMIDs, and CHECK_RESULT_ASSERT.

12.156.1.8 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_By_1Reference_-initIDs (JNIEnv * *env*, jclass *j_by_ref_class*)

Definition at line 90 of file ppl_java_globals.cc.

References Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::By_Reference_init_ID, Parma_Polyhedra_Library::Interfaces::Java::Java_FMID_Cache::By_Reference_obj_ID, Parma_-Polyhedra_Library::Interfaces::Java::cached_FMIDs, and CHECK_RESULT_ASSERT.

12.156.1.9 JNIEXPORT jint JNICALL Java_parma_1polyhedra_1library_Coefficient_bits (JNIEnv *, jclass)

Definition at line 102 of file ppl_java_globals.cc.

12.156.1.10 JNIEXPORT void JNICALL Java_parma_1polyhedra_1library_Coefficient_initIDs (JNIEnv * *env*, jclass *j_coeff_class*)

12.157 PPL_Object.java File Reference

Classes

- class parma_polyhedra_library::PPL_Object

  Smart pointer to a PPL, C++ object.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.158 Rational_Box.java File Reference

Classes

- class parma_polyhedra_library::Rational_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Rational_Box.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.159 Relation_Symbol.java File Reference

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

Enumerations

- enum parma_polyhedra_library::Relation_Symbol {

  parma_polyhedra_library::LESS_THAN, parma_polyhedra_library::LESS_OR_EQUAL, parma_polyhedra_library::EQUAL, parma_polyhedra_library::GREATER_OR_EQUAL,

  parma_polyhedra_library::GREATER_THAN }

  Relation symbols.

12.160 Termination.java File Reference

Classes

- class parma_polyhedra_library::Termination

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.161 Timeout_Exception.java File Reference

Classes

- class parma_polyhedra_library::Timeout_Exception

  Exceptions caused by timeout expiring.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.162 Uint16_Box.java File Reference

Classes

- class parma_polyhedra_library::Uint16_Box

  Java class interfacing C++ Parma_Polyhedra_Library::Uint16_Box.

Namespaces

- namespace parma_polyhedra_library

  The PPL Java interface package.

12.163 Uint32_Box.java File Reference

Classes

- class parma_polyhedra_library::Uint32_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Uint32_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.164 Uint64_Box.java File Reference

Classes

- class parma_polyhedra_library::Uint64_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Uint64_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.165 Uint8_Box.java File Reference

Classes

- class parma_polyhedra_library::Uint8_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Uint8_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.166 Variable.java File Reference

Classes

- class parma_polyhedra_library::Variable
  A dimension of the vector space.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.167 Variables_Set.java File Reference

Classes

- class parma_polyhedra_library::Variables_Set
  A java.util.TreeSet of variables' indexes.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.

12.168 Z_Box.java File Reference

Classes

- class parma_polyhedra_library::Z_Box
  Java class interfacing C++ Parma_Polyhedra_Library::Z_Box.

Namespaces

- namespace parma_polyhedra_library
  The PPL Java interface package.
